Summary

Since I was a child, I was always very curious about how things worked, that is so true that my nickname was destructor because no toy was left intact in my hands. Since childhood I have always been interested and curious to understand how things worked "my toys didn't enjoy this at all". And that's how I started my journey in the world of technology in 2011 as a self-taught, I got the necessary qualification to enter the world where everything is possible by programming. And here we are today, a professional with many years of experience in front and back-end analysis and development.
